15th SSM National Conference Returns With Focus On Navigating Business In The Digital Era

KUALA LUMPUR, July 17 (Bernama) -- The Companies Commission of Malaysia (SSM) will host the 15th edition of the SSM National Conference (SSMNC), reaffirming its commitment to advancing thought leadership on corporate governance, digital transformation and sustainable business practices in Malaysia.

The two-day hybrid conference, scheduled on Aug 18 and 19, 2026 at the Kuala Lumpur Convention Centre and online, aims to provide a dynamic platform for corporate professionals to engage in meaningful discourse while gaining practical insights from industry leaders, regulators and governance professionals.

With the theme, "Navigating Business in the Digital Era: Trust. Efficiency. Sustainability.", SSMNC2026 is aligned with the aspirations of the 13th Malaysia Plan and will explore how organisations can leverage digital transformation, artificial intelligence (AI), data-driven decision-making and emerging technologies while strengthening governance, transparency and sustainability.

Over the years, SSMNC has made its mark as an earnest discourse and networking platform for business and corporate professionals to remain informed and connected in an evolving business landscape.

SSM Chief Executive Officer Datuk Nor Azimah Abdul Aziz said the digital era has created unprecedented opportunities for businesses to innovate, expand and compete, while demanding greater accountability, stronger governance as well as a deeper commitment to build and maintain trust.

"Trust. Efficiency. Sustainability", is not merely this year's conference theme. It reflects three business imperatives that must advance together. Digital transformation without trust weakens confidence. Efficiency without good governance compromises integrity. Sustainability without innovation limits long-term growth.

"The 2026 SSMNC theme also resonates with SSM's new vision under its Strategic Direction Plan IV (2026-2030) that reflects SSM's commitment to be a leader in empowering a trusted, efficient and sustainable business ecosystem.

"Through SSMNC2026, we hope to foster meaningful conversations on how organisations can strike the right balance to remain competitive, responsible and resilient in an increasingly digital world."

This year's conference will feature 16 plenary sessions and a Company Secretary Masterclass, bringing together distinguished speakers from government agencies, regulatory bodies, professional organisations, academia and the corporate sector to share practical insights on issues shaping the future of business and corporate governance.

Among the distinguished speakers include Chief Executive Officer of Capital A Berhad Tan Sri Tony Fernandes, former Chief Justice of Malaysia Tun Tengku Maimun Tuan Mat, Chief Executive Officer of the Inland Revenue Board of Malaysia Datuk Dr Abu Tariq Jamaluddin, renowned fashion entrepreneur Melinda Looi and Malaysia's first Mount Everest summiteer Datuk M. Magendran.

Participants will also gain insights into SSM's latest regulatory and digital initiatives, including the Corporate Registry System (CRS), Malaysian Business Reporting System (MBRS), MBRS Sandbox, BizCodEX and BizAi, which are designed to strengthen business compliance, corporate reporting and service delivery.

Meanwhile, the Company Secretary Masterclass, to be held on Aug 20 will feature specialised sessions on conflict of interest, related-party transactions, artificial intelligence readiness, SSM investigations, advanced governance and risk management, providing company secretaries with practical guidance on emerging governance and compliance issues.

Participants attending SSMNC2026 will also have the opportunity to earn Continuing Professional Education (CPE) points, while the conference remains HRD Corp claimable, making it a valuable platform for continuous professional development.

The conference is expected to attract approximately 2,000 delegates comprising company directors, company secretaries, corporate practitioners, regulators, professionals, academicians and senior executives from across various sectors.

Don't miss this opportunity to gain valuable insights into governance, digital transformation and sustainable business practices at one of Malaysia's premier corporate conferences.
