

REMOTE WORKING - SECURITY CHALLENGES & SOLUTIONS

Tugu Negara Monument, Kuala Lumpur

COURSE INTRODUCTION

Remote work has gone from being a minority of the workforce to what is now a sizable portion of the labor market. The rise of remote working has seen employees enjoy a better work/life balance and the freedom to work from wherever they want. While companies have reaped the benefits of reduced overheads, remote working has raised the issue of new cybersecurity risks and threats that could wreak havoc on their businesses. Inadequate data security in remote work scenarios can result in data breaches, where hackers can exploit vulnerabilities, jeopardizing data confidentiality. Such breaches can have severe consequences, including ransomware attacks and reputational damage.

A security or data breach can cost a business tens of thousands or even millions of dollars. That means those cost savings from remote work can quickly evaporate. With the right security measures adopted for a modern remote force, businesses can mitigate security risks and stay safe.

REMOTE WORKING - SECURITY CHALLENGES & SOLUTIONS

COURSE CONTENTS

1. **GET READY!** If you are connecting to your office network through VPN and RDP you are possibly piping malwares from remote system straight to the heart of your infrastructure! Learn how to defend.
2. **Multi-Factor Authentication (MFA)** – Are you still replying only on Username and password? Learn about MFA as it provides an additional layer of security beyond simple passwords, making it more challenging for attackers to gain unauthorized access.
3. **SANITISING MACHINES!** – For employees who are returning to office after a long time or returning from an offsite assignment, do you have an onboarding policy / process to sanitize their machines? Learn what needs to be in the onboarding policy and how to get it implemented.
4. **PATCH MANAGEMENT POLICY & TECHNOLOGY** – All employee machines may be exploitable since they may not be installing patches. Learn how to handle this to fix them now or you stand to lose the infrastructure to the hackers.
5. **EMPLOYEE TRAINING & AWARENESS** – Investing in employee training is essential to mitigating risks tied to human errors. Such programs should teach employees about identifying phishing attempts, securing their home networks, and adhering to company policies related to data security. Do you have one? Learn how to effectively run your awareness programs.
6. **SECURE ONLINE MEETING** – As online meetings have become a part of our work life; do you have safe online meeting policy in place? Have you trained your employees? Learn how to conduct / participate in online meeting securely.
7. **ZERO TRUST ARCHITECTURE** – A "Zero Trust" approach can be efficient, where trust is never assumed, and verification is required from anyone trying to access resources in your network. Understand the concept of zero trust and its implementation.
